Daksh SCRA – Source Code Analysis Report

May 05, 2023

Scan Summary

Note: At the moment, the summary section is still being developed and only includes sample information. While not restricted to these, the section will feature the following details.

Inputs received:

- [*] Rule Selected = 'php'
- [*] File Types Selected = 'php'
- [*] Target Directory = '../..../Code/Platform/PHP/online-book-store/'
- [*] Filetypes Selected: ['*.php', '*.ini', '*.txt', '*.config', '*.xml', '*.lock', '*.htaccess']

Detection Summary:

- [*] Total files scanned: 44
- [*] File Extentions Identified: ['.php', '.txt']
- [*] Areas of interests identified: 200

Scan Duration:

- [*] Scan Start Time: 2023-04-30 12:44:53
- [*] Scan End Time: 2023-04-30 12:44:53
- [*] Total Time Taken: 2023-04-30 12:44:53

Security - Areas of Interest

This section lists the key areas within the source code that need to be examined for identifying potential security weaknesses.

The code reviewer should carefully examine the identified areas and review any reported code snippets and file paths to validate the presence of any potential vulnerabilities. The validation process should involve a thorough analysis of the code and its associated components to determine the extent of the potential security risk. Any issues identified during the validation process should be documented.

Parsed Paths - Areas of Interest

This section contains a list of file paths that have been identified by matching them with a predefined set of keywords. These files are typically of interest to a code reviewer, and should be examined for possible security vulnerabilities or insecure implementations.

[+] Keyword Searched : Security Functionality

- Source File : i_academy/system/core/Security.php
- Source File : i_academy/system/helpers/security_helper.php

[+] Keyword Searched : Permissions

- Source File : i_academy/application/libraries/Stripe/lib/Exception/PermissionException.php
- Source File : i_academy/application/views/backend/admin/admin_permission.php

[+] Keyword Searched : Password

- Source File : i_academy/application/views/backend/admin/password_resets.php
- Source File : i_academy/application/views/frontend/default/reset_password.php
- Source File : i_academy/application/views/frontend/default/sign_up_password.php
- Source File : i_academy/system/core/compat/password.php

Identified Files Path

In this section, you'll find a comprehensive list of project file paths that were parsed during the analysis. This list was generated based on the selected file types during the scanning process and was used to identify the areas of interest listed in the previous sections. It's important to note that this list includes all the files, making it a superset of the list provided in the "Parsed Paths - Areas of Interest" section.

It is still recommended for code reviewers to review this list for any potentially interesting files that may have been overlooked in the "Parsed Paths - Areas of Interest" section.
